

S.iPTV™ MVP

Media Viewing Platform

Simplify your content viewing experience, anytime, anywhere

The S.iPTV MVP is an essential small form factor platform designed to meet the needs of a dedicated media viewing platform for the S.iPTV ecosystem. Built on CoralOS and managed by S.iPTV, it provides the most comprehensive and secure viewing experience.

Brief

Single channel and Picture in Picture viewing of your channels in a compact and portable form factor. The S.iPTV™ MVP is designed for single-user viewing, common area, and digital signage playback applications.

Fully integrated and managed by the S.iPTV™ platform, the MVP is a simple and elegant tool for local or remote playback of your media and content.
